ROLMS to TAMIS-R Discrepancies

- In the rare instance where the Supported Unit finds their copies of documentation and the ASP upload does not match during the Reconcile process, the Unit must contact the ASP.
- ASP will investigate these discrepancies and any documentation or accounting errors will be corrected in ROLMS.
- The next Daily upload into TAMIS-R process will make the necessary corrections.
- Neither the Supporting nor Supported Unit can correct the discrepancies in TAMIS-R.
- When the discrepancy cannot be fixed in ROLMS, the Supported Unit will contact the helpdesk at tamis@usmc.mil and provide any/all information regarding the discrepancy.
